

Air Products' INDURA to Invest In New Capacity in Chile

May 28, 2013

LEHIGH VALLEY, Pa., May 28, 2013 /PRNewswire/ -- Air Products (NYSE: APD) today announced that INDURA, its South American joint venture, will build a new plant in Antofagasta, Chile, as well as expand the capacity of its Graneros plant, south of Santiago.

These new investments will meet the increasing demand for industrial gases in the northern and central regions of Chile, driven largely by the mining, metal fabrication and food industries.

"With this new plant in Antofagasta and expansion in Graneros, we are investing in the right places to serve the industries that continue to grow and depend on the safe and reliable supply of our products for their processes," said Mike Olivares, vice president and general manager, Latin America for Air Products.

Antofagasta's new plant will produce oxygen, nitrogen and argon. Its construction and the Graneros expansion will mean an investment of more than \$15 million.

The new capacity follows the opening of a new [plant](#) in Puerto Varas, Chile, in 2012, to support local industries, including the growing aquaculture market.

Indura has annual sales of \$478 million/CLP 244 billion. Its integrated gas and retail business includes liquid bulk, small on-sites and packaged gases. In July 2012, [Air Products purchased a majority stake in Indura](#), complementing its existing interests in Latin America, through its wholly-owned businesses in Brazil and Argentina and its joint venture, Grupo Infra, headquartered in Mexico.

About Air Products
