Q1 FY22 Reconciliation Tables

February 4, 2022

Purpose of Reconciliation Tables

Our financial presentations, earnings conference calls, and other investor and analyst communications may include references to non-GAAP (“adjusted”) financial measures. Unless otherwise stated, these measures are based on our continuing operations and are generally identified by the word “adjusted” or “non-GAAP” preceding the measure. We believe these non-GAAP measures provide useful information to evaluate the performance of our business by providing a more complete understanding of the factors and trends that affect our financial performance. The purpose of this document is to provide reconciliations between the historical non-GAAP financial measures that we have disclosed and the most directly comparable measure calculated and presented in accordance with U.S. generally accepted accounting principles (“GAAP”). Amounts provided herein are in millions of dollars unless otherwise indicated, except for per share data. Amounts presented as “LTM” are calculated on a trailing twelve-month basis (i.e., “last twelve months”).

Our non-GAAP financial measures should be considered within the context of our complete audited and unaudited financial results for the given period, which are available in the “Investors” section of our website at www.airproducts.com. The non-GAAP financial measures supplement our GAAP disclosures and are not meant to be considered in isolation or as a substitute for the most directly comparable measures prepared in accordance with GAAP. These measures may not be comparable to similarly titled measures used by other companies.

Outlook

FY22 Adjusted EPS

The guidance provided below is on an adjusted continuing operations basis and is compared to adjusted historical diluted EPS. These adjusted measures exclude the impact of certain items that we believe are not representative of our underlying business performance, such as the incurrence of additional costs for cost reduction actions and impairment charges, or the recognition of gains or losses on disclosed items. It is not possible, without unreasonable efforts, to identify the timing or occurrence of these events or the potential for other transactions that may impact future GAAP EPS. Furthermore, it is not possible to identify the potential significance of these events in advance, but any of these events, if they were to occur, could have a significant effect on our future GAAP EPS. Accordingly, management is unable to reconcile, without unreasonable efforts, the Company’s forecasted range of adjusted EPS on a continuing operations basis to a comparable GAAP range. The per share impact for each non-GAAP adjustment was calculated independently and may not sum to total adjusted diluted EPS due to rounding.

FY22 Capital Expenditures

We expect capital expenditures of approximately \$4.5 to \$5 billion for full-year fiscal 2022. It is not possible, without unreasonable efforts, to reconcile our forecasted capital expenditures to future cash used for investing activities because we are unable to identify the timing or occurrence of our future investment activity, which is driven by our assessment of competing opportunities at the time we enter into transactions. These decisions, either individually or in the aggregate, could have a significant effect on our cash used for investing activities.
