AIR PRODUCTS AND CHEMICALS, INC. and Subsidiaries
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Millions of dollars unless otherwise indicated, except for share data)

1. BASIS OF PRESENTATION AND MAJOR ACCOUNTING POLICIES

Refer to our 2013 Form 10-K for a description of major accounting policies. There have been no material changes to these accounting policies during the first nine months of fiscal year 2014.

The consolidated financial statements of Air Products and Chemicals, Inc. and its subsidiaries (“we,” “our,” “us,” the “Company,” “Air Products,” or “registrant”) included herein have been prepared by us, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been condensed or omitted pursuant to such rules and regulations. In our opinion, the accompanying statements reflect adjustments necessary to present fairly the financial position, results of operations, and cash flows for those periods indicated, and contain adequate disclosure to make the information presented not misleading. Adjustments included herein are of a normal, recurring nature unless otherwise disclosed in the Notes. The interim results for the periods indicated herein, however, do not reflect certain adjustments, such as the valuation of inventories on the last-in, first-out (LIFO) cost basis, which are only finally determined on an annual basis. The consolidated financial statements and related Notes included herein should be read in conjunction with the financial statements and Notes thereto included in our latest Form 10-K in order to fully understand the basis of presentation. Results of operations for interim periods are not necessarily indicative of the results of operations for a full year.

2. NEW ACCOUNTING GUIDANCE

Accounting Guidance Implemented in 2014

Amounts Reclassified out of Accumulated Other Comprehensive Income

In February 2013, the Financial Accounting Standards Board (FASB) issued disclosure guidance to improve the transparency of items reclassified out of accumulated other comprehensive income to net income. The guidance requires an entity to present, in a single location, information about the amounts reclassified out of accumulated other comprehensive income, by component, including the income statement line items affected by the reclassification. This disclosure guidance was effective for us beginning in the first quarter of fiscal year 2014 and did not have a material impact on our consolidated financial statements. Refer to Note 14, Accumulated Other Comprehensive Loss, for the required disclosures.

Cumulative Translation Adjustment

In March 2013, the FASB issued an update to clarify existing guidance for the release of cumulative translation adjustments into net income when a parent sells all or a part of its investment in a foreign entity or achieves a business combination of a foreign entity in stages. We adopted this guidance, which is to be applied prospectively, at the beginning of fiscal year 2014. This guidance did not have an impact on our consolidated financial statements.

New Accounting Guidance to be Implemented

Unrecognized Tax Benefits

In July 2013, the FASB issued guidance to require standard presentation of an unrecognized tax benefit when a carryforward related to net operating losses or tax credits exists. This guidance will be applied prospectively and is effective for us beginning in the first quarter of fiscal year 2015, with early adoption permitted. We do not expect this guidance to have a material impact on our consolidated financial statements.

Discontinued Operations

In April 2014, the FASB issued an update to change the criteria for determining which disposals qualify as a discontinued operation and to expand related disclosure requirements. Under the new guidance, a disposal is required to be reported in discontinued operations if the disposal represents a strategic shift that has or will have a major effect on operations and financial results. This guidance will be effective prospectively for new disposals and new disposal groups classified as held for sale beginning in fiscal year 2016, with early adoption permitted.

[Table of Contents](#)

Revenue Recognition

In May 2014, the FASB issued guidance based on the principle that revenue is recognized in an amount which the entity expects to be entitled in exchange for the transfer of goods or services. This guidance is effective for us beginning in fiscal year 2018 and can be adopted either retrospectively or as a cumulative-effect adjustment as of the date of adoption. Early adoption is not permitted. We are currently evaluating the adoption alternatives and impact that this update will have on our consolidated financial statements.

Share-based Compensation

In June 2014, the FASB issued guidance clarifying that share-based compensation performance targets that could be achieved after the requisite service period should be treated as a performance condition that affects vesting, rather than a condition that affects the grant-date fair value of the award. This guidance is effective for us beginning in fiscal year 2017, with early adoption permitted. We do not expect this guidance to have a material impact on our consolidated financial statements.

3. DISCONTINUED OPERATIONS

During the second quarter of 2012, the Board of Directors authorized the sale of our Homecare business, which had previously been reported as part of the Merchant Gases operating segment.

In the third quarter of 2012, we sold the majority of our Homecare business to The Linde Group for total sale proceeds of €590 million (\$777). This amount included contingent proceeds of €110 million (\$144) related to the outcome of certain retender arrangements. As of 30 June 2014, this liability is reflected in payables and accrued liabilities on our consolidated balance sheet. Based on the outcome of the tenders, the Company was contractually required to return the proceeds to The Linde Group. We settled this liability on 17 July 2014.

In the first quarter of 2014, we sold the remaining portion of the Homecare business, which was primarily in the United Kingdom and Ireland, for £6.1 million (\$9.8) and recorded a gain on sale of \$2.4. We entered into an operations guarantee related to the obligations under certain homecare contracts assigned in connection with the transaction. Our maximum potential payment under the guarantee is £20 million (approximately \$34 at 30 June 2014), and our exposure will be extinguished by 2020. The fair value of the guarantee is not material.

The results of discontinued operations are summarized below:

	Three Months Ended 30 June		Nine Months Ended 30 June	
	2014	2013	2014	2013
Sales	\$—	\$12.7	\$ 8.5	\$40.0
Income before taxes	\$—	\$.5	\$.7	\$ 3.3
Income tax provision	—	(.1)	—	.2

Gain on sale of business, net of tax	—	—	2.4	—
Income from Discontinued Operations, net of tax	\$—	\$.6	\$ 3.1	\$ 3.1

The assets and liabilities classified as discontinued operations for the Homecare business at 30 September 2013 consisted of \$2.5 in trade receivables, net, and \$2.4 in payables and accrued liabilities. As of 30 June 2014, no assets or liabilities were classified as discontinued operations.

4. BUSINESS RESTRUCTURING AND COST REDUCTION PLANS

2013 Plan

During the fourth quarter of 2013, we recorded an expense of \$231.6 (\$157.9 after-tax, or \$.74 per share) reflecting actions to better align our cost structure with current market conditions. The asset and contract actions primarily impacted the Electronics business due to continued weakness in the photovoltaic (PV) and light-emitting diode (LED) markets. The severance and other contractual benefits primarily impacted our Merchant Gases business and corporate functions in response to weaker than expected business conditions in Europe and Asia, reorganization of our operations and functional areas, and previously announced senior executive changes. The planned actions are expected to be completed by the end of fiscal year 2014.

The following table summarizes the carrying amount of the accrual for the 2013 plan at 30 June 2014:

	Severance and Other Benefits	Asset Actions	Contract Actions/Other	Total
2013 Charge	\$ 71.9	\$ 100.4	\$ 59.3	\$ 231.6
Amount reflected in pension liability	(6.9)	—	—	(6.9)
Noncash expenses	—	(100.4)	—	(100.4)
Cash expenditures	(3.0)	—	(58.5)	(61.5)
Currency translation adjustment	.4	—	—	.4
30 September 2013	\$ 62.4	\$ —	\$.8	\$ 63.2
Cash expenditures	(31.3)	—	(.8)	(32.1)
Currency translation adjustment	.1	—	—	.1
Accrued balance	\$ 31.2	\$ —	\$ —	\$ 31.2

2012 Plans

In 2012, we recorded an expense of \$327.4 (\$222.4 after-tax, or \$1.03 per share) for business restructuring and cost reduction plans in our Polyurethane Intermediates, Electronics, and European Merchant businesses. As of 30 September 2013, the planned actions were substantially complete.

5. BUSINESS COMBINATIONS

2013 Business Combinations

We completed two acquisitions during the third quarter of 2013. The acquisitions were accounted for as business combinations, and their results of operations were consolidated within their respective segments after the acquisition dates. The aggregate purchase price, net of cash acquired, for these acquisitions was \$134.

On 31 May 2013, we acquired EPCO Carbondioxide Products, Inc. (EPCO), the largest independent U.S. producer of liquid carbon dioxide (CO₂). This acquisition expanded our North American offerings of bulk industrial process gases in the Merchant Gases segment. In addition, we acquired Wuxi Chem-Gas Company, Ltd. (WCG) on 1 April 2013. This acquisition provided our Merchant Gases segment with additional gases presence in the Jiangsu Province of China.

6. INVENTORIES

The components of inventories are as follows:

	30 June 2014	30 September 2013
Finished goods	\$514.5	\$527.3
Work in process	37.9	38.7
Raw materials, supplies and other	234.3	234.9
	\$786.7	\$800.9
Less: Excess of FIFO cost over LIFO cost	(96.5)	(94.8)
	\$690.2	\$706.1

First-in, first-out (FIFO) cost approximates replacement cost. Our inventories generally have a high turnover, and as a result, there is little difference between the original cost of an item and its current replacement cost.

7. GOODWILL

Changes to the carrying amount of consolidated goodwill by segment for the nine months ended 30 June 2014 are as follows:

	Merchant Gases	Tonnage Gases	Electronics and Performance Materials	Total
Balance at 30 September 2013	\$1,192.0	\$15.2	\$446.6	\$1,653.8
Currency translation and other	(48.7)	.7	6.7	(41.3)
Balance at 30 June 2014	\$1,143.3	\$15.9	\$453.3	\$1,612.5

Goodwill is subject to impairment testing at least annually. In addition, goodwill is tested more frequently if a change in circumstances or the occurrence of events indicates that potential impairment exists.

8. FINANCIAL INSTRUMENTS

Currency Price Risk Management

Our earnings, cash flows, and financial position are exposed to foreign currency risk from foreign currency denominated transactions and net investments in foreign operations. It is our policy to minimize our cash flow volatility from changes in currency exchange rates. This is accomplished by identifying and evaluating the risk that our cash flows will change in value due to changes in exchange rates and by executing the appropriate strategies necessary to manage such exposures. Our objective is to maintain economically balanced currency risk management strategies that provide adequate downside protection.

Forward Exchange Contracts

We enter into forward exchange contracts to reduce the cash flow exposure to foreign currency fluctuations associated with highly anticipated cash flows and certain firm commitments such as the purchase of plant and equipment. We also enter into forward exchange contracts to hedge the cash flow exposure on intercompany loans. This portfolio of forward exchange contracts consists primarily of Euros and British Pound Sterling as well as Euros and U.S. dollars. The maximum remaining term of any forward exchange contract currently outstanding and designated as a cash flow hedge at 30 June 2014 is 3.6 years.

Forward exchange contracts are also used to hedge the value of investments in certain foreign subsidiaries and affiliates by creating a liability in a currency in which we have a net equity position. The primary currency pair in this portfolio of forward exchange contracts is the Euro and U.S. dollar.

In addition to the forward exchange contracts that are designated as hedges, we utilize forward exchange contracts that are not designated as hedges. These contracts are used to economically hedge foreign currency-denominated monetary assets and liabilities, primarily working capital. The primary objective of these forward exchange contracts is to protect the value of foreign currency-denominated monetary assets and liabilities from the effects of volatility in foreign exchange rates that might occur prior to their receipt or settlement. This portfolio of forward exchange contracts comprises many different foreign currency pairs, with a profile that changes from time to time depending on business activity and sourcing decisions.

[Table of Contents](#)

The table below summarizes our outstanding currency price risk management instruments:

	30 June 2014		30 September 2013	
	US\$ Notional	Years Average Maturity	US\$ Notional	Years Average Maturity
Forward exchange contracts:				
Cash flow hedges	\$2,456.6	.4	\$2,653.4	.6
Net investment hedges	742.4	3.1	1,231.8	2.4
Not designated	431.1	.1	751.9	.1
Total Forward Exchange Contracts	\$3,630.1	.9	\$4,637.1	1.0

In addition to the above, we use foreign currency-denominated debt to hedge the foreign currency exposures of our net investment in certain foreign subsidiaries. The designated foreign currency denominated debt and related accrued interest included €892.5 million (\$1,222.0) and Chinese Renminbi 748.5 million (\$120.7) at 30 June 2014 and €908.3 million (\$1,228.4) at 30 September 2013.

Debt Portfolio Management

It is our policy to identify on a continuing basis the need for debt capital and evaluate the financial risks inherent in funding the Company with debt capital. Reflecting the result of this ongoing review, the debt portfolio and hedging program are managed with the objectives and intent to (1) reduce funding risk with respect to borrowings made by us to preserve our access to debt capital and provide debt capital as required for funding and liquidity purposes, and (2) manage the aggregate interest rate risk and the debt portfolio in accordance with certain debt management parameters.

Interest Rate Management Contracts

We enter into interest rate swaps to change the fixed/variable interest rate mix of our debt portfolio in order to maintain the percentage of fixed- and variable-rate debt within the parameters set by management. In accordance with these parameters, the agreements are used to manage interest rate risks and costs inherent in our debt portfolio. Our interest rate management portfolio generally consists of fixed to floating interest rate swaps (which are designated as fair value hedges), pre-issuance interest rate swaps and treasury locks (which hedge the interest rate risk associated with anticipated fixed-rate debt issuances and are designated as cash flow hedges), and floating to fixed interest rate swaps (which are designated as cash flow hedges). At 30 June 2014, the outstanding interest rate swaps were denominated in U.S. dollars, Euros, and Chilean Pesos. The maximum remaining term of any interest rate swap designated as a cash flow hedge is .7 years. The notional amount of the interest rate swap agreements is equal to or less than the designated debt being hedged. When interest rate swaps are used to hedge variable-rate debt, the indices of the swaps and the debt to which they are designated are the same. It is our policy not to enter into any interest rate management contracts which lever a move in interest rates on a greater than one-to-one basis.

Cross Currency Interest Rate Swap Contracts

We enter into cross currency interest rate swap contracts when our risk management function deems necessary. These contracts may entail both the exchange of fixed- and floating-rate interest payments periodically over the life of the agreement and the exchange of one currency for another currency at inception and at a specified future date. These contracts effectively convert the currency denomination of a debt instrument into another currency in which we have a net equity position while changing the interest rate characteristics of the instrument. The contracts are used to hedge either certain net investments in foreign operations or non-functional currency cash flows related to intercompany loans. The current cross currency interest rate swap portfolio consists of fixed-to-fixed swaps between U.S. dollars and Chilean Pesos, U.S. dollars and offshore Chinese Renminbi, U.S. dollars and British Pound Sterling, as well as U.S. dollars and Euros.

- (A) Other includes the impact on other comprehensive income (OCI) and earnings primarily related to interest rate and cross currency interest rate swaps.
- (B) The impact of fair value hedges noted above was largely offset by gains and losses resulting from the impact of changes in related interest rates on recognized outstanding debt.
- (C) The impact of the non-designated hedges noted above was largely offset by gains and losses, respectively, resulting from the impact of changes in exchange rates on recognized assets and liabilities denominated in nonfunctional currencies.

The amount of cash flow hedges' unrealized gains and losses at 30 June 2014 that are expected to be reclassified to earnings in the next twelve months is not material.

The cash flows related to all derivative contracts are reported in the operating activities section of the consolidated statements of cash flows.

Credit Risk-Related Contingent Features

Certain derivative instruments are executed under agreements that require us to maintain a minimum credit rating with both Standard & Poor's and Moody's. If our credit rating falls below this threshold, the counterparty to the derivative instruments has the right to request full collateralization on the derivatives' net liability position. The net liability position of derivatives with credit risk-related contingent features was \$19.2 as of 30 June 2014 and \$10.0 as of 30 September 2013. Because our current credit rating is above the various pre-established thresholds, no collateral has been posted on these liability positions.

Counterparty Credit Risk Management

We execute all financial derivative transactions with counterparties that are highly rated financial institutions, all of which are investment grade at this time. Some of our underlying derivative agreements give us the right to require the institution to post collateral if its credit rating falls below the pre-established thresholds with Standard & Poor's or Moody's. These are the same agreements referenced in Credit Risk-Related Contingent Features above. The collateral that the counterparties would be required to post was \$55.4 as of 30 June 2014 and \$80.6 as of 30 September 2013. No financial institution is required to post collateral at this time, as all have credit ratings at or above the threshold.

9. FAIR VALUE MEASUREMENTS

Fair value is defined as an exit price, i.e., the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels as follows:

- Level 1 — Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 — Inputs that are observable for the asset or liability, either directly or indirectly through market corroboration, for substantially the full term of the asset or liability.
- Level 3 — Inputs that are unobservable for the asset or liability based on our own assumptions (about the assumptions market participants would use in pricing the asset or liability).

The methods and assumptions used to measure the fair value of financial instruments are as follows:

Derivatives

The fair value of our interest rate management contracts and forward exchange contracts are quantified using the income approach and are based on estimates using standard pricing models. These models take into account the value of future cash flows as of the balance sheet date, discounted to a present value using discount factors that match both the time to maturity and currency of the underlying instruments. The computation of the fair values of these instruments is generally performed by the Company. These standard pricing models utilize inputs which are derived from or corroborated by observable market data such as interest rate yield curves and currency spot and forward rates. In addition, on an ongoing basis, we randomly test a subset of our valuations against valuations received from the transaction's counterparty to validate the accuracy of our standard pricing models. Counterparties to these derivative contracts are highly rated financial institutions.

Refer to Note 8, Financial Instruments, for a description of derivative instruments, including details on the balance sheet line classifications.

[Table of Contents](#)

Long-term Debt

The fair value of our debt is based on estimates using standard pricing models that take into account the value of future cash flows as of the balance sheet date, discounted to a present value using discount factors that match both the time to maturity and currency of the underlying instruments. These standard valuation models utilize observable market data such as interest rate yield curves and currency spot rates. Therefore, the fair value of our debt is classified as a level 2 measurement. We generally perform the computation of the fair value of these instruments.

The carrying values and fair values of financial instruments were as follows:

	30 June 2014		30 September 2013	
	Carrying Value	Fair Value	Carrying Value	Fair Value
Assets				
Derivatives				
Forward exchange contracts	\$ 66.8	\$ 66.8	\$ 90.5	\$ 90.5
Interest rate management contracts	56.2	56.2	35.4	35.4

Long-term debt, including current portion	5,020.8	5,258.0	5,563.7	5,804.1

The carrying amounts reported in the balance sheet for cash and cash items, trade receivables, payables and accrued liabilities, accrued income taxes, and short-term borrowings approximate fair value due to the short-term nature of these instruments. Accordingly, these items have been excluded from the above table.

The following table summarizes assets and liabilities measured at fair value on a recurring basis in the consolidated balance sheets:

10. RETIREMENT BENEFITS

The components of net periodic benefit cost for the defined benefit pension and other postretirement benefit plans for the three and nine months ended 30 June 2014 and 2013 were as follows:

Three Months Ended 30 June	Pension Benefits				Other Benefits	
	2014		2013		2014	2013

Other	—	1.6	—	1.6	—	—
Net periodic benefit cost	\$ 50.2	\$ 47.9	\$ 81.7	\$ 36.3	\$ 5.5	\$ 6.4

Net periodic benefit cost is primarily included in cost of sales and selling and administrative expense on our consolidated income statements. The amount of net periodic benefit cost capitalized in 2014 and 2013 was not material.

For the nine months ended 30 June 2014 and 2013, our cash contributions to funded pension plans and benefit payments under unfunded pension plans were \$64.7 and \$258.6, respectively. Total contributions for fiscal 2014 are expected to be approximately \$80 to \$100. During fiscal 2013, total contributions were \$300.8.

11. COMMITMENTS AND CONTINGENCIES

Litigation

We are involved in various legal proceedings, including competition, environmental, health, safety, product liability, and insurance matters. In September 2010, the Brazilian Administrative Council for Economic Defense (CADE) issued a decision against our Brazilian subsidiary, Air Products Brasil Ltda., and several other Brazilian industrial gas companies for alleged anticompetitive activities. CADE imposed a civil fine of R\$179.2 million (approximately \$81 at 30 June 2014) on Air Products Brasil Ltda. This fine was based on a recommendation by a unit of the Brazilian Ministry of Justice, whose investigation began in 2003, alleging violation of competition laws with respect to the sale of industrial and medical gases. The fines are based on a percentage of our total revenue in Brazil in 2003.

We have denied the allegations made by the authorities and filed an appeal in October 2010 with the Brazilian courts. On 6 May 2014, our appeal was granted and the fine against Air Products Brasil Ltda. was dismissed. CADE has appealed that ruling and the matter remains pending. We, with advice of our outside legal counsel, have assessed the status of this matter and have concluded that, although an adverse final judgment after exhausting all appeals is possible, such a judgment is not probable. As a result, no provision has been made in the consolidated financial statements. We estimate the maximum possible loss to be the full amount of the fine of R\$179.2 million (approximately \$81 at 30 June 2014) plus interest accrued thereon until final disposition of the proceedings.

[Table of Contents](#)

While we do not expect that any sums we may have to pay in connection with this or any other legal proceeding would have a material adverse effect on our consolidated financial position or net cash flows, a future charge for regulatory fines or damage awards could have a significant impact on our net income in the period in which it is recorded.

Environmental

In the normal course of business, we are involved in legal proceedings under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA: the federal Superfund law), Resource Conservation and Recovery Act (RCRA), and similar state and foreign environmental laws relating to the designation of certain sites for investigation or remediation. Presently, there are approximately 35 sites on which a final settlement has not been reached where we, along with others, have been designated a potentially responsible party by the Environmental Protection Agency or are otherwise engaged in investigation or remediation, including cleanup activity at certain of our current and former manufacturing sites. We continually monitor these sites for which we have environmental exposure.

Accruals for environmental loss contingencies are recorded when it is probable that a liability has been incurred and the amount of loss can be reasonably estimated. The consolidated balance sheets at 30 June 2014 and 30 September 2013 included an accrual of \$84.9 and \$86.7, respectively, primarily as part of other noncurrent liabilities. The environmental liabilities will be paid over a period of up to 30 years. We estimate the exposure for environmental loss contingencies to range from \$84 to a reasonably possible upper exposure of \$98 as of 30 June 2014.

Actual costs to be incurred at identified sites in future periods may vary from the estimates, given inherent uncertainties in evaluating environmental exposures. Using reasonably possible alternative assumptions of the exposure level could result in an increase to the environmental accrual. Due to the inherent uncertainties related to environmental exposures, a significant increase to the reasonably possible upper exposure level could occur if a new site is designated, the scope of remediation is increased, a different remediation alternative is identified, or a significant increase in our proportionate share occurs. We do not expect that any sum we may have to pay in connection with environmental matters in excess of the amounts recorded or disclosed above would have a material adverse impact on our financial position or results of operations in any one year.

PACE

At 30 June 2014, \$32.3 of the environmental accrual was related to the Pace facility.

In 2006, we sold our Amines business, which included operations at Pace, Florida and recognized a liability for retained environmental obligations associated with remediation activities at Pace. We are required by the Florida Department of Environmental Protection (FDEP) and the United States Environmental Protection Agency (USEPA) to continue our remediation efforts. We estimated that it would take about 20 years to complete the groundwater remediation, and the costs through completion were estimated to range from \$42 to \$52. As no amount within the range was a better estimate than another, we recognized a pretax expense in fiscal 2006 of \$42.0 as a component of income from discontinued operations and recorded an environmental accrual of \$42.0 in continuing operations on the consolidated balance sheets. There has been no change to the estimated exposure range related to the Pace facility.

We have implemented many of the remedial corrective measures at the Pace, Florida facility required under 1995 Consent Orders issued by the FDEP and the USEPA. Contaminated soils have been bioremediated, and the treated soils have been secured in a lined on-site disposal cell. Several groundwater recovery systems have been installed to contain and remove contamination from groundwater. We completed an extensive assessment of the site to determine how well existing measures are working, what additional corrective measures may be needed, and whether newer remediation technologies that were not available in the 1990s might be suitable to more quickly and effectively remove groundwater contaminants. Based on assessment results, we completed a focused feasibility study that appears to have identified new and alternative approaches that should more effectively remove contaminants and achieve the targeted remediation goals. We continue to review the new approaches with the FDEP.

PIEDMONT

At 30 June 2014, \$19.0 of the environmental accrual was related to the Piedmont site.

On 30 June 2008, we sold our Elkton, Maryland and Piedmont, South Carolina production facilities and the related North American atmospheric emulsions and global pressure sensitive adhesives businesses. In connection with the sale, we recognized a liability for retained environmental obligations associated with remediation activities at the Piedmont site. This site is under active remediation for contamination caused by an insolvent prior owner. The sale of the site triggered expense recognition. Prior to the sale, remediation costs had been capitalized since they improved the property as compared to its condition when originally acquired. We are required by the South Carolina Department of Health and Environmental Control to address both contaminated soil and groundwater. Numerous areas of soil contamination have been addressed, and contaminated groundwater is being recovered and treated. We estimate that it will take until 2017 to complete source area remediation and another 15 years thereafter to complete groundwater recovery, with costs through completion estimated to be \$24. We recognized a pretax expense in 2008 of \$24.0 as a component of income from discontinued operations and recorded an environmental liability of \$24.0 in continuing operations on the consolidated balance sheets. There has been no change to the estimated exposure.

[Table of Contents](#)

PAULSBORO

At 30 June 2014, \$4.5 of the environmental accrual was related to the Paulsboro site.

During the first quarter of 2009, management committed to a plan to sell the production facility in Paulsboro, New Jersey and recognized a \$16.0 environmental liability associated with this site. The change in the liability balance since it was established is a result of spending and changes in the estimated exposure. In December 2009, we completed the sale of this facility. We are required by the New Jersey state law to investigate and, if contaminated, remediate a site upon its sale. We estimate that it will take several years to complete the investigation/remediation efforts at this site.

PASADENA

At 30 June 2014, \$12.4 of the environmental accrual was related to the Pasadena site.

During the fourth quarter of 2012, management committed to permanently shutting down our Polyurethane Intermediates (PUI) production facility in Pasadena, Texas. In shutting down and dismantling the facility, we will undertake certain remediation obligations related to soil and groundwater contaminants. We have been pumping and treating the groundwater to control off-site migration of contaminated groundwater in compliance with regulatory requirements and under the approval of the Texas Commission on Environmental Quality (TCEQ). We estimate that we will continue this program for 30 years subsequent to the shutdown of the PUI production facility. In addition, we will perform additional work to address other environmental obligations at the site. This additional work includes investigating other potential solid waste management units, performing post closure care for two closed RCRA surface impoundment units and establishing engineering controls. In 2012, we estimated the total exposure at this site to be \$13.0. There has been no change to the estimated exposure.

12. SHARE-BASED COMPENSATION

We have various share-based compensation programs, which include stock options, deferred stock units, and restricted stock. Under all programs, the terms of the awards are fixed at the grant date. We issue shares from treasury stock upon the exercise of stock options, the payout of deferred stock units, and the issuance of restricted stock awards. As of 30 June 2014, there were 5,693,543 shares available for future grant under our Long-Term Incentive Plan, which is shareholder approved.

During the nine months ended 30 June 2014, we granted 778,928 stock options at a weighted-average exercise price of \$107.69 and an estimated fair value of \$28.72 per option. The fair value of these options was estimated using a Black Scholes option valuation model that used the following assumptions:

Expected volatility	29.8%–30.3%
Expected dividend yield	2.5%
Expected life (in years)	7.4–8.4
Risk-free interest rate	2.3%–2.7%

In addition, we granted 223,195 deferred stock units at a weighted-average grant-date fair value of \$108.68 and 12,649 restricted shares at a weighted-average grant-date fair value of \$107.69.

Share-based compensation cost recognized in the consolidated income statement is summarized below:

	Three Months Ended 30 June		Nine Months Ended 30 June	
	2014	2013	2014	2013
Before-Tax Share-Based Compensation Cost	\$ 9.1	\$10.6	\$ 32.5	\$ 33.0

After-Tax Share-Based Compensation Cost	\$ 5.9	\$ 6.8	\$ 21.1	\$ 21.1

Before-tax share-based compensation cost is primarily included in selling and administrative expense on our consolidated income statements. The amount of share-based compensation cost capitalized in 2014 and 2013 was not material.

15. NONCONTROLLING INTERESTS

INDURA S.A.

Redeemable Noncontrolling Interest

In 2012, we purchased a controlling equity interest in the outstanding shares of Indura S.A. As part of the purchase agreement, the largest minority shareholder in Indura S.A. has the right to exercise a put option to require us to purchase up to a 30.5% equity interest during the two-year period beginning on 1 July 2015, at a redemption value equal to fair market value (subject to a minimum price based upon the acquisition date value escalated by an inflation factor). The put option is embedded within the minority interest shares that are subject to the put option. The redemption feature requires classification of the minority shareholder's interest in the consolidated balance sheet outside of equity under the caption "Redeemable Noncontrolling Interest." This business has not performed as well as anticipated in the current year. We continue to evaluate the long-term outlook for the business.

Adjustments to the value of the redeemable noncontrolling interest due to the redemption feature, if any, will be recognized as they occur and recorded within capital in excess of par value.

The following is a summary of the changes in redeemable noncontrolling interest for the three and nine months ended 30 June:

	Three Months Ended 30 June	
	2014	2013
Balance at 31 March	\$ 343.6	\$ 398.7
Net income	1.1	2.6
Dividends	(1.2)	(1.1)

Dividends	(4.7)	(1.1)
Currency translation adjustment	(32.8)	(26.4)
Balance at 30 June	\$ 341.4	\$ 371.8

As of 30 June 2014, we have a 67.3% controlling equity interest in Indura S.A.

16. EARNINGS PER SHARE

Options on .7 million and .8 million shares were antidilutive and therefore excluded from the computation of diluted earnings per share for the three and nine months ended 30 June 2014, respectively. Options on 1.1 million and 2.8 million shares were antidilutive and therefore excluded from the computation of diluted earnings per share for the three and nine months ended 30 June 2013, respectively.

17. SUPPLEMENTAL INFORMATION

Credit Agreement

On 30 April 2013, we entered into a five-year \$2,500.0 revolving credit agreement with a syndicate of banks (the “2013 Credit Agreement”), under which senior unsecured debt is available to us and certain of our subsidiaries until maturity on 30 April 2018. On 30 June 2014, we amended the 2013 Credit Agreement to exercise our option to increase the facility to \$2,595.0. All other terms remain unchanged from the original agreement. The 2013 Credit Agreement provides us with a source of liquidity and supports our commercial paper program. No borrowings were outstanding under the 2013 Credit Agreement as of 30 June 2014.

Debt

As of 30 June 2014, we have classified \$400.0 of commercial paper and a 3.875% Eurobond for €300.0 million (\$411) maturing in March 2015 as long-term debt because we have the ability to refinance the debt on a long-term basis under the 2013 Credit Agreement. Our current intent is to refinance this debt via the U.S. or European public or private placement markets.

Share Repurchase Program

On 15 September 2011, the Board of Directors authorized the repurchase of up to \$1,000 of our outstanding common stock. We repurchase shares pursuant to Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended, through repurchase agreements established with several brokers. During fiscal year 2013, we purchased 5.7 million of our outstanding shares at a cost of \$461.6. There were no purchases during the first nine months of fiscal year 2014. At 30 June 2014, \$485.3 in share repurchase authorization remains.

Subsequent Event

On 17 July 2014, the Board of Directors declared the fourth quarter dividend of \$.77. The dividend is payable on 10 November 2014 to shareholders of record at the close of business on 1 October 2014.

18. BUSINESS SEGMENT INFORMATION

[Table of Contents](#)**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

(Millions of dollars, except for share data)

The disclosures in this quarterly report are complementary to those made in our 2013 Form 10-K. An analysis of results for the third quarter and first nine months of 2014 is provided in the Management's Discussion and Analysis to follow.

All comparisons in the discussion are to the corresponding prior year unless otherwise stated. All amounts presented are in accordance with U.S. generally accepted accounting principles (GAAP), except as noted.

Captions such as income from continuing operations attributable to Air Products, net income attributable to Air Products, and diluted earnings per share attributable to Air Products are simply referred to as "income from continuing operations," "net income," and "diluted earnings per share" throughout this Management's Discussion and Analysis, unless otherwise stated.

THIRD QUARTER 2014 VS. THIRD QUARTER 2013**THIRD QUARTER 2014 IN SUMMARY**

- Sales of \$2,634.6 increased 3%, or \$87.3. Underlying sales increased 3%, primarily from volume growth in Merchant Gases and Electronics and Performance Materials, partially offset by the exit from our polyurethane intermediates (PUI) business.
- Operating income of \$413.8 increased 8%, or \$30.7, primarily from strong results in Electronics and Performance Materials and improved pricing in Merchant Gases. Operating margin of 15.7% increased 70 basis points (bp), as the contribution from higher volumes was partially offset by higher costs driven by maintenance outages.
- Income from continuing operations of \$314.0 increased 9%, or \$26.2, and diluted earnings per share from continuing operations of \$1.46 increased 7%, or \$.10. A summary table of changes in diluted earnings per share is presented below.

Sales

	% Change from Prior Year
Underlying business	
Volume	2%
Price	1%
Currency	— %
Energy and raw material cost pass-through	— %
Total Consolidated Change	3%

Underlying sales were up 3% from higher volumes of 2% and higher pricing of 1%. Volumes increased from growth in the Merchant Gases and Electronics and Performance Materials segments, partially offset by the exit from our PUI business. The favorable pricing was primarily in the Merchant Gases segment.

Operating Income

Operating income of \$413.8 increased 8%, or \$30.7, as higher volumes of \$43 were partially offset by higher costs of \$13, including maintenance costs in Tonnage Gases.

Equity Affiliates' Income

Income from equity affiliates of \$43.1 decreased \$1.1.

Selling and Administrative Expense

Selling and administrative expense of \$272.0 increased \$.7, as inflation was mostly offset by productivity. Selling and administrative expense, as a percent of sales, decreased from 10.7% to 10.3%.

Research and Development

Research and development expense of \$33.8 increased \$.3. Research and development expense, as a percent of sales, was 1.3% in 2014 and 2013.

Other Income (Expense), Net

Other income (expense), net of \$3.7 decreased \$12.4 primarily due to lower gains from the sale of assets and unfavorable foreign exchange impacts. Additionally, the prior year included a favorable commercial contract settlement offset by a pension settlement.

Interest Expense

	Three Months Ended 30 June	
	2014	2013
Interest incurred	\$38.9	\$42.2
Less: capitalized interest	7.6	6.8
Interest expense	\$31.3	\$35.4

Interest incurred decreased \$3.3. The decrease was driven primarily by a lower average interest rate on the debt portfolio. The change in capitalized interest was driven by an increase in project spending.

Effective Tax Rate

The effective tax rate equals the income tax provision divided by income from continuing operations before taxes. The effective tax rate was 24.0% in the third quarter of 2014 and 2013.

Outlook

Our management evaluates the Company's strategy and portfolio on an ongoing basis. Future actions and assessments that result from the ongoing review could materially impact our operating profit.

Merchant Gases Sales

	% Change from Prior Year
Underlying business	
Volume	3%
Price	1%
Currency	— %
Total Merchant Gases Sales Change	4%

Underlying sales increased 4% from higher volumes of 3% and higher pricing of 1%. Volumes were higher from continued strength in liquid oxygen and nitrogen across all regions, partially offset by lower global helium volumes.

In the U.S./Canada, sales increased 8%, with increased volumes of 3% and pricing up 5%. Higher liquid oxygen and nitrogen volumes to the metals and chemicals end markets were partially offset by lower helium and argon volumes due to supply constraints. Volumes also increased as a result of our EPCO Carbon dioxide Products, Inc. acquisition. Pricing was higher primarily due to higher pricing in liquid oxygen, liquid nitrogen, and helium, including actions to recover higher weather related costs from the second quarter.

In Europe, sales increased 6%, due to a favorable currency impact of 6% and higher price of 1%, partially offset by volumes down 1%. Volumes were lower as higher liquid oxygen, nitrogen, and argon volumes were more than offset by lower helium volumes and lower cylinder volumes as construction remains weak. Pricing was higher primarily due to improved helium and cylinder pricing. The favorable currency impacts were primarily from the Euro and the Pound Sterling.

In Asia, sales increased 5%, with higher volumes of 6% partially offset by reduced pricing of 1%. Volumes were higher as higher liquid oxygen, nitrogen, and argon volumes across the whole region, were partially offset by lower helium volumes. Pricing decreased as higher helium pricing was more than offset by lower pricing in liquid oxygen, nitrogen, and argon, particularly in China, driven in part by a higher mix of wholesale customers.

In South America, sales decreased 8%, with higher volumes of 1% and higher pricing of 3% more than offset by unfavorable currency impacts of 12% from the Brazilian Real and the Chilean Peso. Volumes increased in Brazil and were modestly higher in Chile as slower global demand mitigated growth. This business has not performed as well as anticipated in the current year. We continue to evaluate the long-term outlook for the business.

[Table of Contents](#)**Merchant Gases Operating Income and Margin**

Operating income was higher by \$8.6 due to higher recovery of raw material costs in pricing of \$6, including the prior quarter severe weather impacts in North America, and higher volumes of \$5, partially offset by higher costs of \$4. Operating margin increased 10 bp from prior year.

Merchant Gases Equity Affiliates' Income

Merchant Gases equity affiliates' income of \$36.5 decreased \$.1.

Tonnage Gases

Tonnage Gases Sales

	% Change from Prior Year
Underlying business	
Volume	(2)%
Currency	1%
Energy and raw material cost pass-through	— %
Total Tonnage Gases Sales Change	(1)%

Sales decreased 1%, or \$10.2. Volumes decreased 2% as strong demand in the U.S. Gulf Coast hydrogen system and volumes from new plants were more than offset by the exit from our PUI business. The lower PUI volumes decreased sales by 4%. As of the end of the first quarter of 2014, our exit from the PUI business was complete. Favorable currency impacts increased sales by 1%.

Tonnage Gases Operating Income and Margin

Operating income was lower by 2% as higher operating costs, including maintenance costs, of \$17 were partially offset by favorable volume mix of \$14. Operating margin decreased 10 bp from the prior year, primarily due to the higher maintenance costs mostly offset by the favorable volume mix.

Total Electronics and Performance Materials Sales Change	9%

Sales increased 9% from higher volumes of 9% and favorable currency of 1%, partially offset by lower pricing of 1%. Electronics sales increased 6% from strength across all product lines. Performance Materials sales increased 12% primarily from higher volumes across all product lines and major regions due to higher global demand and new offerings.

Electronics and Performance Materials Operating Income and Margin

Operating income increased 23%, or \$20.2, primarily due to higher volumes of \$21 and lower costs of \$4, partially offset by unfavorable price and mix impacts of \$7. The lower costs included the benefits of our recent business restructuring and cost reduction actions. Operating margin of 17.3% increased 200 bp primarily due to the higher volumes and improved cost performance, partially offset by the unfavorable pricing impacts.

Equipment and Energy

	Three Months Ended 30 June		\$ Change	Change
	2014	2013		
Sales	\$104.2	\$103.6	\$.6	1%
Operating income	17.4	16.0	1.4	9%

Equipment and Energy Sales and Operating Income

Sales of \$104.2 and operating income of \$17.4 increased due to higher liquefied natural gas (LNG) activity partially offset by lower air separation unit (ASU) activity.

The sales backlog for the Equipment business at 30 June 2014 was \$584 compared to \$402 at 30 September 2013. The increase was primarily due to new LNG orders as global project development activity remains high.

Other

Other operating income (loss) primarily includes other expense and income that cannot be directly associated with the business segments, including foreign exchange gains and losses. Also included are LIFO inventory adjustments, as the business segments use FIFO, and the LIFO pool adjustments are not allocated to the business segments.

Other operating loss was \$(1.6) versus an operating loss of \$(4.5) in the prior year. The prior year included a pension settlement of \$4.5. No other individual items were significant in comparison to the prior year.

FIRST NINE MONTHS 2014 VS. FIRST NINE MONTHS 2013**FIRST NINE MONTHS 2014 IN SUMMARY**

- Sales of \$7,762.0 increased 2%, or \$168.1. Underlying sales increased by 1% as higher volumes in the Merchant Gases and Electronics and Performance Materials segments were partially offset by lower volumes in our Tonnage Gases and Equipment and Energy segments, including the exit from our PUI business. Higher energy contractual cost pass-through to customers increased sales by 1%.
- Operating income of \$1,184.1 increased 3%, or \$38.9, as strong results in Electronics and Performance Materials and Equipment and Energy were partially offset by lower results in Merchant Gases and Tonnage Gases. Operating margin of 15.3% increased 20 bp as higher volumes were partially offset by higher costs.
- Income from continuing operations of \$884.6 increased 4%, or \$30.6, and diluted earnings per share from continuing operations of \$4.12 increased \$.09. A summary table of changes in diluted earnings per share is presented below.
- We increased our quarterly dividend by 8% from \$.71 to \$.77 per share. This represents the 32nd consecutive year that we have increased our dividend payment.

Volumes up 1% as higher volumes in the Merchant Gases and Electronics and Performance Materials segments were offset by lower volumes in our Tonnage Gases and Equipment and Energy segments, including the exit from our PUI business. Pricing was flat as higher pricing in Merchant Gases was offset by lower pricing in Electronics and Performance Materials. Higher energy contractual cost pass-through to customers increased sales by 1%.

Operating Income

Operating income of \$1,184.1 increased 3%, or \$38.9 primarily due to higher volumes of \$101, partially offset by lower recovery of raw material costs in pricing of \$35 and higher operating costs, including maintenance costs in Tonnage Gases, of \$21. Prior year operating income included the gain on a sale of our investment in an equity affiliate of \$5.

Equity Affiliates' Income

Income from equity affiliates of \$111.7 decreased \$13.7, due to lower results in a Tonnage Gases affiliate, higher costs in Merchant Gases affiliates, and unfavorable currency impacts in Mexico, South Africa, and India.

Selling and Administrative Expense

Selling and administrative expense of \$816.3 increased \$10.2, as inflation was partially offset by productivity. Selling and administrative expense, as a percent of sales, decreased from 10.6% to 10.5%.

Research and Development

Research and development expense of \$100.5 increased \$1.4 primarily due to inflation. Research and development expense, as a percent of sales, was 1.3% in 2014 and 2013.

Other Income (Expense), Net

Other income (expense), net of \$41.1 decreased \$4.6. The prior year included the gain on a sale of our investment in an equity affiliate and a favorable commercial contract settlement, partially offset by a pension settlement. Otherwise, no individual items were significant in comparison to the prior year.

Interest incurred	\$119.1	\$124.8
Less: capitalized interest	23.0	18.4
Interest expense	\$ 96.1	\$106.4

Interest incurred decreased \$5.7. The decrease was driven primarily by a lower average interest rate on the debt portfolio, partially offset by a higher average debt balance. The change in capitalized interest was driven by an increase in project spending.

Effective Tax Rate

The effective tax rate equals the income tax provision divided by income from continuing operations before taxes. The effective tax rate was 24.1% and 24.2% in 2014 and 2013, respectively.

Discontinued Operations

The Homecare business, which had been previously reported as part of the Merchant Gases business segment, has been accounted for as a discontinued operation.

In the third quarter of 2012, we sold the majority of our Homecare business to The Linde Group for total sale proceeds of €590 million (\$777) and recognized a gain of \$207.4 (\$150.3 after-tax, or \$.70 per share). In the third quarter of 2012, an impairment charge of \$33.5 (\$29.5 after-tax, or \$.14 per share) was recorded to write down the remaining business, which was primarily in the United Kingdom and Ireland, to its estimated net realizable value. In the fourth quarter of 2013, we recorded an additional charge of \$18.7 (\$13.6 after-tax, or \$.06 per share) to update our estimate of net realizable value. In the first quarter of 2014, we sold the remaining portion of the Homecare business for £6.1 million (\$9.8) and recorded a gain on the sale of \$2.4.

Refer to Note 3, Discontinued Operations, to the consolidated financial statements for additional details on this business.

Total Merchant Gases Sales Change	4%

Underlying sales increased 4% due to higher volumes of 3% and higher pricing of 1%.

In the U.S./Canada, sales increased 8%, with volumes up 4% and price up 4%. Volumes increased as higher liquid oxygen and liquid nitrogen volumes to metals were partially offset by lower helium volumes. Volumes also increased as a result of our EPCO Carbon dioxide Products, Inc. acquisition.

[Table of Contents](#)

In Europe, sales increased 4% due to favorable currency impacts of 4%. Volumes were flat as higher liquid oxygen, nitrogen, and argon volumes were offset by lower helium volumes and lower packaged gases volumes. The favorable currency impacts are primarily due to the Euro and the Pound Sterling.

In Asia, sales increased 6%, due to volumes up 7% partially offset by pricing down 1%. Volumes were higher as higher liquid oxygen, nitrogen, and argon volumes were partially offset by lower helium volumes. Pricing decreased in liquid oxygen, nitrogen, and argon, particularly in China, driven by a higher mix of wholesale customers.

In South America, sales decreased 7%, as unfavorable currency impacts of 11%, were partially offset by higher volumes of 2% and higher pricing of 2%. The unfavorable currency impacts included both the Brazilian Real and the Chilean Peso.

Merchant Gases Operating Income and Margin

Operating income of \$486.1 was lower by \$17.9, or 4%, as higher operating costs of \$21 and lower recovery of raw material costs in pricing of \$10 were partially offset by higher volumes of \$20. The prior year also included the gain on a sale of our investment in an equity affiliate of \$5. Operating margin decreased 120 bp from prior year, primarily due to higher power and fuel costs.

Merchant Gases Equity Affiliates' Income

Merchant Gases equity affiliates' income of \$99.9 decreased \$6.6, primarily from unfavorable currency impacts in Mexico, South Africa, and India and higher costs.

Total Tonnage Gases Sales Change	(3)%

Volumes decreased 8% as strong demand in the U.S. Gulf Coast hydrogen system was more than offset by reduced volumes due to lower volumes in South America and the exit from our PUI business. The lower PUI volumes decreased sales by 4%. As of the end of the first quarter of 2014, our exit from the PUI business was complete. Favorable currency impacts increased sales by 1%. Higher energy contractual cost pass-through to customers increased sales by 4%.

Tonnage Gases Operating Income and Margin

Operating income of \$347.3 was lower by \$33.9, or 9%, primarily due to higher costs, including maintenance, of \$31 and lower volumes of \$3. Operating margin decreased 90 bp from prior year, primarily due to the higher maintenance costs and higher pass-through of energy costs.

Sales increased 8% as higher volumes of 8% and favorable currency of 1% were partially offset by lower pricing of 1%. Electronics sales increased 5% as higher delivery systems equipment sales and materials volumes of 6% were partially offset by lower pricing of 1%. Performance Materials sales increased 10% as higher volumes of 11% and favorable currency of 1% were partially offset by lower pricing of 2%. The higher volumes were across all products lines and major regions. The lower pricing was primarily due to unfavorable mix impacts.

Electronics and Performance Materials Operating Income and Margin

Operating income of \$297.6 increased 32%, or \$72.0, from higher volumes of \$68 and lower operating costs of \$25, partially offset by unfavorable price and mix impacts of \$25. The lower operating costs primarily include the benefits of our recent business restructuring and cost reduction actions. Operating margin of 16.6% increased 300 bp primarily due to the higher volumes and improved cost performance, partially offset by the unfavorable pricing impacts.

Equipment and Energy

Equipment and Energy Sales and Operating Income

Sales of \$325.0 decreased as higher LNG project activity was more than offset by lower ASU project activity. Operating income of \$60.8 increased from the higher LNG activity.

Other

Other operating loss was \$(7.7) compared to \$(10.6) in the prior year. The prior year included a pension settlement of \$4.5. No other individual items were significant in comparison to the prior year.

PENSION BENEFITS

Pension funding includes both contributions to funded plans and benefit payments for unfunded plans, which are primarily non-qualified plans. With respect to funded plans, our funding policy is that contributions, combined with appreciation and earnings, will be sufficient to pay benefits without creating unnecessary surpluses. In addition, we make contributions to satisfy all legal funding requirements while managing our capacity to benefit from tax deductions attributable to plan contributions. For the nine months ended 30 June 2014, required cash contributions to funded pension plans and benefit payments under unfunded pension plans were \$64.7. For the nine months ended 30 June 2013, cash contributions were \$258.6, which included voluntary contributions of \$220. Total contributions for fiscal 2014 are expected to be approximately \$80 to \$100. During fiscal 2013, total contributions were \$300.8.

Our U.S. supplemental pension plan provides for a lump sum benefit payment option at the time of retirement, or for corporate officers, six months after the retirement date. Pension settlements are recognized when cash payments exceed the sum of the service and interest cost components of net periodic pension cost of the plan for the fiscal year. We anticipate pension settlements in the fourth quarter of 2014.

Refer to Note 10, Retirement Benefits, to the consolidated financial statements for details on pension cost and cash contributions.

LIQUIDITY AND CAPITAL RESOURCES

We have maintained a strong financial position through the first nine months of 2014. We continue to have consistent access to commercial paper markets and cash flows from operations and financing activities are expected to meet liquidity needs for the foreseeable future.

As of 30 June 2014, we had \$329.8 of foreign cash and cash items compared to total cash and cash items of \$337.6. If the foreign cash and cash items are needed for operations in the U.S. or we otherwise elect to repatriate the funds, we may be required to accrue and pay U.S. taxes on a significant portion of these amounts. However, since we have significant current investment plans outside the U.S., it is our intent to permanently reinvest the majority of our foreign cash and cash items outside the U.S. Current financing alternatives do not require the repatriation of foreign funds.

The narrative below refers to the consolidated statements of cash flows included on page 6.

Operating Activities

For the first nine months of 2014, cash provided by operating activities was \$1,584.0, including income from continuing operations of \$884.6. Income from continuing operations is adjusted for reconciling items that include depreciation and amortization, undistributed earnings of equity affiliates, share-based compensation expense, and noncurrent capital lease receivables. The working capital accounts were a use of cash of \$183.1, including an increase in trade receivables of \$77.1 and a decrease in accounts payable and accrued liabilities of \$125.6 which included payments related to the 2013 business restructuring and cost reduction plan of \$32.1 and payments associated with projects accounted for as capital leases of \$79.8.

Other adjustments includes pension and postretirement expense of \$103.6 and contributions to our pension plans of \$64.7, primarily for plans in the U.K. Management considers various factors when making pension funding decisions, including tax, cash flow, and regulatory implications.

For the first nine months of 2013, cash provided by operating activities was \$1,051.2, primarily driven by income from continuing operations of \$854.0. The working capital accounts were a use of cash of \$249.9, including an increase in trade receivables of \$88.9 and a decrease in accounts payable and accrued liabilities which included payments related to the business restructuring and cost reduction plans of \$54.4. Other adjustments includes pension and postretirement expense of \$124.4 and contributions to our pension plans of \$258.6, primarily for plans in the U.S.

Investing Activities

For the first nine months of 2014, cash used for investing activities was \$1,230.1, primarily driven by capital expenditures for plant and equipment of \$1,264.9.

For the first nine months of 2013, cash used for investing activities was \$1,218.2, primarily driven by capital expenditures for plant and equipment of \$1,115.4. During the third quarter of 2013, we had acquisitions for \$125.6, net of cash acquired, which included EPCO and WCG. See Note 5, Business Combinations, for additional details regarding these transactions.

[Table of Contents](#)

Capital expenditures are detailed in the table below:

	Nine Months Ended 30 June	
	2014	2013
Additions to plant and equipment	\$1,264.9	\$1,115.4
Acquisitions, less cash acquired	—	125.6
Capital expenditures on a GAAP basis	\$1,264.9	\$1,241.0
Capital lease expenditures ^(A)	156.8	179.1
Purchase of noncontrolling interests ^(A)	—	12.6
Capital expenditures on a Non-GAAP basis	\$1,421.7	\$1,432.7

^(A) We utilize a non-GAAP measure in the computation of capital expenditures and include spending associated with facilities accounted for as capital leases. Certain contracts associated with facilities that are built to provide product to a specific customer are required to be accounted for as leases, and such spending is reflected as a use of cash within cash provided by operating activities, if the arrangement qualifies as a capital lease. Additionally, the purchase of noncontrolling interests in a subsidiary is accounted for as an equity transaction and is reflected as a financing activity in the statement of cash flows. The presentation of this non-GAAP measure is intended to enhance the usefulness of information by providing a measure that our management uses internally to evaluate and manage our expenditures.

Financing Activities

For the first nine months of 2014, cash used by financing activities was \$482.7. Our borrowings (short- and long-term proceeds, net of repayments) were a net use of cash of \$111.7, driven primarily by the repayment of a 3.75% Eurobond of €300 million (\$401.0) in November 2013 and the repayment of \$190.7 of other, primarily international, debt, partially offset by an increase in commercial paper and short-term borrowings of \$422.7. The primary additional use of cash was to pay dividends of \$463.7.

For the first nine months of 2013, cash provided by financing activities was \$125.1. Our borrowings (short- and long-term proceeds, net of repayments) were a net source of cash of \$887.2, driven primarily by an increase in commercial paper and short-term borrowings of \$780.8 and the issuance of a \$400.0 senior fixed-rate 2.75% note on 4 February 2013, partially offset by the repayment of a \$300.0 senior fixed-rate 4.15% note on 1 February 2013. The primary uses of cash were to purchase 5.7 million shares of treasury stock for \$461.6 and to pay dividends of \$416.8.

Discontinued Operations

For the first nine months of 2014, cash provided by discontinued operations was \$10.5. The sale of the remaining Homecare business, which was primarily in the United Kingdom and Ireland, generated proceeds of £6.1 million (\$9.8) and a \$2.4 gain which are included in discontinued operations in the consolidated statements of cash flows. Refer to Note 3, Discontinued Operations, to the consolidated financial statements for additional information.

Financing and Capital Structure

Total debt at 30 June 2014 and 30 September 2013, expressed as a percentage of the sum of total debt and total capitalization (total debt plus total equity plus redeemable noncontrolling interest), was 42.8% and 45.3%, respectively. Total debt decreased from \$6,273.6 at 30 September 2013 to \$6,136.0 at 30 June 2014.

During fiscal 2013, we entered into a five-year \$2,500.0 revolving credit agreement maturing 30 April 2018 with a syndicate of banks (the “2013 Credit Agreement”), under which senior unsecured debt is available to both the Company and certain of its subsidiaries. Effective 30 June 2014, the 2013 Credit Agreement was amended to increase the facility to \$2,595.0. The 2013 Credit Agreement provides a source of liquidity for the Company and supports its commercial paper program. The Company’s only financial covenant is a maximum ratio of total debt to total capitalization of 70%. No borrowings were outstanding under the 2013 Credit Agreement as of 30 June 2014.

Effective 11 June 2012, we entered into an offshore Chinese Renminbi (RMB) syndicated credit facility of RMB1,000.0 million (\$160.9), that was to mature in June 2015. On 20 March 2014, we repaid the outstanding balance of RMB 250.0 million (\$40.2) and terminated the credit facility. Additional commitments totaling \$178.5 are maintained by our foreign subsidiaries, of which \$178.5 was borrowed and outstanding at 30 June 2014.

As of 30 June 2014, we are in compliance with all of the financial and other covenants under our debt agreements.

[Table of Contents](#)

As of 30 June 2014, we classified \$400.0 of commercial paper and our 3.875% Eurobond of €300 million (\$411) maturing in March 2015 as long-term debt because we have the ability to refinance the debt under the 2013 Credit Agreement. Our current intent is to refinance this debt via the U.S. or European public or private placement markets.

On 15 September 2011, the Board of Directors authorized the repurchase of up to \$1,000 of our outstanding common stock. During the first nine months of fiscal year 2014, no shares were purchased. At 30 June 2014, \$485.3 in share repurchase authorization remains.

Dividends

Dividends are declared by the Board of Directors and are usually paid during the sixth week after the close of the fiscal quarter. During 2014, the Board of Directors increased the quarterly dividend from \$.71 per share to \$.77 per share. On 17 July 2014, the Board of Directors declared the fourth quarter dividend which is payable on 10 November 2014 to shareholders of record at the close of business on 1 October 2014.

CONTRACTUAL OBLIGATIONS

We are obligated to make future payments under various contracts such as debt agreements, lease agreements, unconditional purchase obligations, and other long-term obligations. During the first nine months of 2014, we repaid a maturing 3.75% Eurobond of €300 million (\$401.0) and terminated our offshore Chinese Renminbi syndicated credit facility. Additionally, on 17 July 2014, we settled a contingent liability of €110 million (\$144) related to the 2012 sale of our Homecare business. See Note 3, Discontinued Operations, to the consolidated financial statements for additional information. Otherwise, there have been no material changes to contractual obligations since 30 September 2013.

COMMITMENTS AND CONTINGENCIES

Other than the operations guarantee associated with the sale of the remaining portion of the Homecare business as discussed in Note 3, Discontinued Operations, to the consolidated financial statements, there have been no material changes to commitments and contingencies since 30 September 2013. For current updates on Litigation and Environmental matters, refer to Note 11, Commitments and Contingencies, in this quarterly filing.

OFF-BALANCE SHEET ARRANGEMENTS

There have been no material changes to off-balance sheet arrangements since 30 September 2013. We are not a primary beneficiary in any material variable interest entity. Our off-balance sheet arrangements are not reasonably likely to have a material impact on financial condition, changes in financial condition, and results of operations or liquidity.

RELATED PARTY TRANSACTIONS

Our principal related parties are equity affiliates operating in the industrial gas business. We did not engage in any material transactions involving related parties that included terms or other aspects that differ from those which would be negotiated at arm's length with clearly independent parties.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's Discussion and Analysis of our financial condition and results of operations is based on the consolidated financial statements and accompanying notes that have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Information concerning our implementation and impact of new accounting standards issued by the FASB is included in Note 2, New Accounting Guidance, to the consolidated financial statements. There have been no changes in accounting policy in the current period that had a material impact on our financial condition, change in financial condition, liquidity, or results of operations.

NEW ACCOUNTING GUIDANCE

See Note 2, New Accounting Guidance, to the consolidated financial statements for information concerning our implementation and impact of new accounting guidance.

FORWARD-LOOKING STATEMENTS

This report contains “forward-looking statements” within the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, including statements about earnings guidance and business outlook. These forward-looking statements are based on management’s reasonable expectations and assumptions as of the date this report is filed. Actual performance and financial results may differ materially from projections and estimates expressed in the forward-looking statements because of many factors not anticipated by management, including, without limitation, weakening or reversal of global or regional economic recovery; future financial and operating performance of major customers; unanticipated contract terminations or customer cancellations or postponement of projects and sales; the impact of competitive products and pricing; unexpected changes in raw material supply and markets; the impact of price fluctuations in natural gas; unanticipated asset impairments or losses; the ability to recover increased energy and raw material costs, including weather related costs, from customers; costs and outcomes of litigation or regulatory investigations; the impact of management and organizational changes, including pension settlement and other associated costs; the success of productivity programs; the timing, impact, and other uncertainties of future acquisitions or divestitures; significant fluctuations in interest rates and foreign currencies from that currently anticipated; political risks, including the risks of unanticipated government actions that may result in project delays, cancellations or expropriations; the impact of changes in environmental, tax or other legislation and regulatory activities in jurisdictions in which the Company and its affiliates operate; the impact on the effective tax rate of changes in the mix of earnings among our U.S. and international operations; and other risk factors described in the Company’s Form 10-K for its fiscal year ended September 30, 2013. The Company disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements contained in this report to reflect any change in the Company’s assumptions, beliefs or expectations or any change in events, conditions, or circumstances upon which any such forward-looking statements are based.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information on our utilization of financial instruments and an analysis of the sensitivity of these instruments to selected changes in market rates and prices is included in our 2013 Form 10-K.

The net financial instrument position decreased from a liability of \$5,719.5 at 30 September 2013 to a liability of \$5,232.9 at 30 June 2014. The decrease is primarily due to the repayment of a 3.75% Eurobond of €300 million (\$401.0) in November 2013, which reduced the book value of long-term debt.

The sensitivity analysis related to the interest rate risk on the fixed portion of our debt portfolio assumes an instantaneous 100 bp move in interest rates from the level at 30 June 2014 with all other variables held constant. A 100 bp increase in market interest rates would result in a decrease in the net liability position of financial instruments of \$190 and \$143 at 30 June 2014 and 30 September 2013, respectively. A 100 bp decrease in market interest rates would result in an increase in the net liability position of financial instruments of \$207 and \$154 at 30 June 2014 and 30 September 2013, respectively. The change in the sensitivity analysis from September 2013 to June 2014 is driven by hedges of anticipated debt issuances that were executed in 2014 and are outstanding at 30 June 2014.

There were no material changes to the sensitivity analysis related to the variable portion of our debt portfolio since 30 September 2013.

The sensitivity analysis related to foreign currency exchange rates assumes an instantaneous 10% change in the foreign currency exchange rates from their levels at 30 June 2014, with all other variables held constant. A 10% strengthening or weakening of the functional currency of an entity versus all other currencies would result in a decrease or increase in the net liability position of financial instruments of \$352 at 30 June 2014 versus \$295 at 30 September 2013, respectively. The change in the sensitivity analysis includes a higher notional amount of cross currency interest rate swaps as of 30 June 2014.

Item 4. Controls and Procedures

We maintain a comprehensive set of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). As of 30 June 2014 (the Evaluation Date), an evaluation of the effectiveness of our disclosure controls and procedures was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report these disclosure controls and procedures were effective.

During the quarter ended on the Evaluation Date, there was no change in internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

† The certification attached as Exhibit 32 that accompanies this Quarterly Report on Form 10-Q, is not deemed filed with the Securities and Exchange Commission and is not to be incorporated by reference into any filing of Air Products and Chemicals, Inc. under the Securities Act of 1933, as amended, or the Securities Exchange Act of 1934, as amended, whether made before or after the date of this Form 10-Q, irrespective of any general incorporation language contained in such filing.

This AMENDMENT NO. 2 is made as of the 30th day of June, 2014 to the Credit Agreement (defined below) by and among Air Products and Chemicals, Inc., the Other Borrowers parties from time to time, The Royal Bank of Scotland plc, as Administrative Agent (the "Administrative Agent") and Banco Bilbao Vizcaya Argentaria, S.A. (the "Supplemental Lender"). All capitalized terms used but not otherwise defined herein shall have the meanings given them in the Credit Agreement.

The Borrowers, the Administrative Agent and the Lenders are parties to the \$2,500,000,000 Revolving Credit Agreement dated as of April 30, 2013 (as amended, restated, modified or supplemented from time to time, the "Credit Agreement").

Pursuant to Section 2.09 of the Credit Agreement, the Borrowers may, at their option, seek to increase the Total Revolving Credit Commitment by obtaining additional Commitments upon satisfaction of certain conditions.

The Supplemental Lender is a new Lender that is a lending institution whose identity the Administrative Agent will approve by its signature below.

In consideration of the foregoing, the Supplemental Lender from and after the date hereof shall have a Revolving Credit Committed Amount of \$95,000,000 as of the date hereof, the Supplemental Lender hereby assumes all of the rights and obligations of a Lender under the Credit Agreement.

The Borrowers have executed and delivered to the Supplemental Lender as of the date hereof, if they were requested by the Supplemental Lender, Notes in the form attached to the Credit Agreement as Exhibit A to evidence the Commitment of the Supplemental Lender.

[signature page follows]

IN WITNESS WHEREOF, the Administrative Agent, the Borrowers and the Supplemental Lender have executed this Amendment as of the date shown above.

AIR PRODUCTS AND CHEMICALS, INC.
CERTIFICATE OF AMENDMENT
OF
RESTATED CERTIFICATE OF INCORPORATION

* * * * *

Air Products and Chemicals, Inc., a corporation organized and existing under and by virtue of the General Corporation Law of the State of Delaware,
DOES HEREBY CERTIFY:

FIRST: That the Board of Directors of said corporation, at a meeting duly held, adopted a resolution proposing and declaring advisable the following amendment to the Certificate of Incorporation of said corporation:

RESOLVED, that the Certificate of Incorporation of Air Products and Chemicals, Inc. be amended by changing the TENTH Article thereof so that, as amended, said Article shall be and read as follows:

TENTH. Section 1. The number of directors which shall constitute the whole Board of Directors of the Corporation shall be the number from time to time fixed by or in the manner provided in the Bylaws of the Corporation, but not less than five nor more than fifteen.

Section 2. Subject to the rights of the holders of any preferred stock, or series thereof, to elect directors:

(a) From the effective date of this Article TENTH filed with the Secretary of State of the State of Delaware until the election of directors at the Corporation's annual meeting of stockholders in 2015, pursuant to Section 141(d) of the Delaware General Corporation Law, the Board of Directors shall continue to be divided into three classes of directors, Class I, Class II, and Class III, with the directors in Class I having a term expiring at the Corporation's annual meeting of stockholders in 2017, the directors in Class II having a term expiring at the Corporation's annual meeting of stockholders in 2015 and the directors in Class III having a term expiring at the Corporation's annual meeting of stockholders in 2016, and directors in each class may be removed only for cause in accordance with Section 141(k)(1) of the Delaware General Corporation Law.

(b) Commencing with the election of directors at the Corporation's annual meeting of stockholders in 2015, pursuant to Section 141(d) of the Delaware General Corporation Law, the Board of Directors shall be divided into two classes of directors, Class I and Class II, with the directors in Class I having a term that expires at the Corporation's annual meeting of stockholders in 2017 and the directors in Class II having a term that expires at the Corporation's annual meeting of stockholders in 2016, and directors in each class may be removed only for cause in accordance with Section 141(k)(1) of the Delaware General Corporation Law. The directors who, immediately prior to the Corporation's annual meeting of stockholders in 2015 were members of Class II (and whose terms expire at the Corporation's annual meeting of stockholders in 2015) or their successors shall be elected at such annual meeting to Class II; the directors who, immediately prior to the Corporation's annual meeting of stockholders in 2015, were members of Class III and whose terms were scheduled to expire at the Corporation's annual meeting of stockholders in 2016 shall be members of Class II; and the directors who, immediately prior to the Corporation's annual meeting of stockholders in 2015, were members of Class I and whose terms expire at the Corporation's annual meeting of stockholders in 2017 shall be members of Class I.

(c) Commencing with the election of directors at the Corporation's annual meeting of stockholders in 2016, pursuant to Section 141(d) of the Delaware General Corporation Law, there shall be a single class of directors, Class I, with all directors of such class having a term that expires at the Corporation's annual meeting of stockholders in 2017, and directors in this class may be removed only for cause in accordance with Section 141(k)(1) of the Delaware General Corporation Law. The directors who, immediately prior to the Corporation's annual meeting of stockholders in 2016, were members of Class II (and whose terms expire at the Corporation's annual meeting of stockholders in 2016) or their successors shall be elected at such meeting to Class I for a term that expires at the Corporation's annual meeting of stockholders in 2017, and the directors who, immediately prior to the Corporation's annual meeting of stockholders in 2016, were members of Class I and whose terms expire at the Corporation's annual meeting of stockholders in 2017 shall be members of Class I.

(d) From and after the election of directors at the Corporation's annual meeting of stockholders in 2017, the Board of Directors shall cease to be classified as provided in Section 141(d) of the Delaware General Corporation Law, and the directors elected at the Corporation's annual meeting of stockholders in 2017 (and each annual meeting of stockholders thereafter) shall be elected for a term expiring at the next annual meeting of stockholders and, from and after the Corporation's annual meeting of

stockholders in 2017, may be removed by the stockholders of the Corporation with or without cause. Prior to the Corporation's annual meeting of stockholders in 2017, and in accordance with Section 141(k)(1) of the Delaware General Corporation Law, the Corporation's Board of Directors shall be classified as provided in subsection (d) of Section 141 of the Delaware General Corporation Law and directors may be removed by the stockholders of the Corporation only for cause. Each director elected at any annual meeting of stockholders shall hold office until such director's successor shall have been duly elected and qualified.

Section 3. Any vacancy or newly created directorship on the Board of Directors, whether arising through death, resignation, retirement or removal of a director or through an increase in the number of directors, shall be filled only by a majority vote of all of the remaining directors, even though less than a quorum, or by a sole remaining director.

SECOND: That the stockholders of said corporation, by a vote of stockholders, have given written consent to said amendment in accordance with the provisions of Section 228 of the General Corporation Law of the State of Delaware, and written notice of the adoption of the amendment has been given as provided in Section 228 of the General Corporation Law of the State of Delaware to every stockholder entitled to such notice.

THIRD: That the aforesaid amendment was duly adopted in accordance with the applicable provisions of Sections 242 and 228 of the General Corporation Law of the State of Delaware.

IN WITNESS WHEREOF, said Air Products and Chemicals, Inc. has caused this certificate to be signed by Mary T. Afflerbach, its Corporate Secretary, this 28th day of January, 2014.
